

CURLY-COATED RETRIEVER EIC DATABASE

Names highlighted in yellow represent curlies whose sire and dam were tested clear of the EIC gene. Only first generation offspring are listed; they are clear of EIC based on the absence of the EIC mutation in both parents.

Names highlighted in purple represent curlies that have been found to be clear of the EIC mutation BOTH by the absence of the mutation in their sire and dam AND by testing of the individual dog.
